Product Description

Ironcraft: 2515 Series 15' Flex-Wing Rotary Cutter

Utilizing a smooth-top deck and spring suspension, the 2515 will quickly work tough jobs. Designed for use with tractors with a 50 horsepower minimum, this medium-duty Flex-Wing requires only one hydraulic remote. For its 180" cut width, the cutter uses three spindles with two free-swinging blades each, which reduce the shock of impact when a stationary object is contacted. Slip clutches protect the gearboxes and drivelines from damage. Standard equipment includes driveline shields, clutch shields, chain discharge shields and a safety tow chain.
